Special presentation:

RTLS Roundtable

Sponsored by:

Wednesday, December 5, 2018, 2:00pm ET

PANELISTS:

Steve Bollinger, Vice President, North American Sales at Centrak

Stephanie Andersen, CEO AT ZulaFly.

Mark Rheault, Founder & CEO at Infinite Leap.

Sandra Rasmussen, Senior Vice President, Global Marketing and North America Sales at Sonitor.

WEBINAR AGENDA: Knowing where equipment and medical devices are located within a health care facility makes life easier for everyone on the staff. And, it helps HTM professionals be more efficient when it comes to their high-priority tasks. There have been some growing pains dating back to the first introduction of real time locating systems (RTLS), but the fast pace of technology advances makes RTLS a valuable tool in 2018.

Webinar Wednesday reached out to several experts in the RTLS world to find out more about the latest advances, cost of ownership and more. Presenters will answer attendee's questions during this live roundtable.

ZULAFLY

ZulaFly has developed a platform and software solution that fits throughout the healthcare continuum; acute care and long-term facilities as well as clinics. We provide software applications with historical and real-time reports for Asset Management, Staff Safety, Environmental Monitoring and Workflow, leveraging our rules engine to notify anyone, anywhere. Our platform has the ability to take in data from any solution, providing the ability to view meaningful information in a single solution.

For more information visit www.zulafly.com

Infinite Leap is the premier healthcare consultant and system integrator for real-time technologies, such as Real-Time Location Systems (RTLS). We deliver end-to-end services, from solution design and business planning to deployment, training, 24/7 support, and managed services. We have helped healthcare systems successfully implement over 100 unique use cases, including Asset Management, Patient Flow, and Wayfinding.

For more information visit www.infiniteleap.net

Sonitor is the leading provider of unique, ultrasound-based Real Time Location System (RTLS) solutions linking the physical world with the Internet of Things (IoT) to provide real-time visibility and connected intelligence. As the first - and only - company to use proprietary ultrasound technology as the primary technology for indoor positioning systems (IPS), Sonitor's platform automatically tracks the real-time location of moveable equipment and people with 100% room or sub-room level accuracy in complex, indoor environments, such as hospitals, clinics and ambulatory surgery centers. With an open integration platform, Sonitor provides the flexibility to leverage best-in-class software application solutions covering many uses such as nurse call, patient flow, workflow and capacity management, hand hygiene and infection control and asset and inventory management.
